Y | FACTORIAL

About Us

Y Factorial, LLC is a custom development firm creating intuitive software.

Our philosophy is that personal relationships are the foundation for engaging business opportunities and that an iterative and transparent development process is a prerequisite for all successful projects.

The Team

Ryan Daigle and Josh Vickery are Y Factorial. Ryan and Josh have been working together in various roles for years and together serve as a self-managing development team.

Ryan Daigle, the founder of Y Factorial, is the author of the Rails2 Peepcode mini-book and the What's New in Edge Rails series.

Josh Vickery is an experienced mobile application developer and open-source advocate.
